

## Getting glasses

Christine needs glasses.  
She goes to an optical store.  
She takes her prescription.

## An optician helps Christine

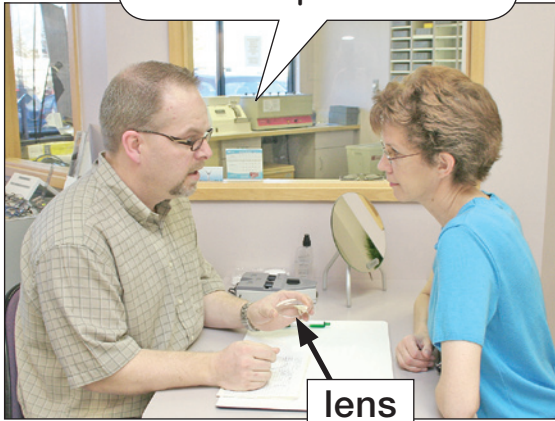

**1** Christine tries on some frames.

**2** Clark is an optician. He helps Christine.

➡ More on page 2

This is a plastic lens.

**3** Christine chooses frames and lenses. She asks, "How much will the glasses cost?"

Look straight ahead.

**4** Clark measures Christine's eyes. Next he orders the lenses and frames.

## Christine's glasses are ready

How does that feel?

**5** Christine goes back to the optical store. She tries on her glasses. Clark adjusts the frames.

**6** Christine pays for her new glasses. They cost \$450.
