

Where do the periods go?

Read out loud to find out!

1 Use your ears.

Do you hear a pause?
Does your voice go up or down?
Do you hear yourself breathe in?

2 Use your body.

Do you feel your shoulders go up as you take a breath?
Do you feel your back or chest move?

3 Use your brain.

Think about the meaning.
Do you talk about two things?
Use a period to keep them apart
or a word to join them together.
